

# Navigation

Google has been very helpful with navigating our travels.

We have a custom Google Map we use as a virtual "Push Pin Map" of every place that we have been so far : <https://www.google.com/maps/d/u/0/embed?mid=1GUIGp4S97MW3H8yPRD00rN5Dz17pOkw&ehbc=2E312F>

You will notice that some places are marked as "No Entry". We don't really want to drive around busy cities because it is really hard to see things and it is time consuming. We will use them as a start and stop point, but not something to spend hours driving around.

We try to limit the amount of cities we visit to 10, which is a good round number.

Google Maps is great if you want to plot course. Example : <https://maps.app.goo.gl/yjFSJASnLZPm9w8d9>

For navigation, [Waze](#) or [Google Maps](#) work well and are great at avoiding speed traps.
